

Amazing events at the gridX booth

- › Obtain first-hand customer references from our partners
- › Launch of our new platform "XENON"
- › gridX cooperates closely with internationally successful companies. Our partners trust in the competence and innovation of gridX to establish digital business models. At the gridX booth you can experience live why our partners rely on gridX and ask questions about the cooperation. You can also expect a look into the future. Here is our E-world program:

Tuesday, 11.02.2020 - gridX' Inside

The first day of the E-world is all about internal success. One highlight is the launch of "XENON". Our new platform, which visualizes all solutions in a dashboard and displays user data in an intuitive interface.

We will present the **EEBUS** initiative together with **Peter Kellendonk** (1st Chairman, EEBUS). EEBUS stands for a unified communication interface that any device and any technical platform can use freely, regardless of manufacturer and technology.

We will also be discussing our "Smart Charging" solution. The dynamic load management of gridX makes expensive grid expansion unnecessary.

Wednesday, 12.02.2020 - Built on "XENON"

On Wednesday, you will have the opportunity to see which solutions have already been built on "XENON". We will present the "Microgrids" solution together with Oliver Schubert from innogy. Here you can see how smart energy quarters can be implemented.

Furthermore you can convince yourself of our solution "Independent Homes". With **Christian Harms-Ensink** from **Viessmann**, we have already implemented this as a whitelabel. We show how intelligent energy management works in your own home.

Together with **Dr. Armin Gaul** from **innogy** we show how prioritised charging works and how the solution "Smart Charging" has already been successfully introduced into the innogy product portfolio.

Thursday, 13.02.2020 - Future on "XENON"

On the last day of the E-world, we will give an outlook on future solutions based on the "XENON" platform and how DERs enables flexible services.

Together with **Dr. Roman Höller** from **E.ON** we will talk about virtual power plants in the decentralized energy age.

There will also be an **EEBUS** Roundtable, where **Daniel Lödige** from **Viessmann**, **Steffen Hornung** from **Theben** and **Marc Eulen** from **KEO** will be at the gridX booth.

Make a note of the dates now!

Meet us: **Smart Energy - Hall 5 | Stand 320**

		Presentation	Speaker	
Tuesday, 11.02.20 »gridX Inside«	10:30 – 11:00	Launch XENON	David Balensiefen Andreas Booke	(Founder, gridX) (Founder, gridX)
	13:00 – 13:30	EEBUS – Language of Energy	Peter Kellendonk Andreas Booke	(1st Chairman, EEBUS) (Founder, gridX)
	15:30 – 16:00	Smart Charging: Saving 200.000 € in infrastructure cost	Dr. Baptiste Feron	(Head of Energy Management, gridX)
Wednesday, 12.02.20 »Built on XENON«	10:30 – 11:00	How Microgrids transform the way of living & building	Oliver Schubert David Balensiefen	(Product Manager, innogy) (Founder, gridX)
	13:00 – 13:30	How Viessmann builds customer centric solutions for generations to come	Christian Harms-Ensink David Balensiefen	(Commercial Director, Viessmann) (Founder, gridX)
	15:30 – 16:00	innogy & gridX: Development of a scalable smart charging product	Dr. Armin Gaul Andreas Booke	(Head of Technical Product Dev., innogy) (Founder, gridX)
Thursday, 13.02.20 »Future on XENON«	10:30 – 11:00	Distributed energy resources providing flexibility services	Tim Steinmetz	(Chief Growth Officer, gridX)
	13:00 – 13:30	Virtual Power Plants in a decentralized energy world	Dr. Roman Höller Andreas Booke	(Senior Innovation Engineer, E.ON) (Founder, gridX)
	15:30 – 16:00	EEBUS Roundtable	Daniel Lödige Marc Eulen Steffen Hornung Andreas Booke	(Product Manager, Viessmann) (Managing Partner, KEO) (Field Application Manager, Theben) (Founder, gridX)
